

ACCO® "TN" Tuna Net Chain

The Best Chain for a Tough Job.

ACCO® uses high quality steel, especially formulated and heat treated for tuna fishing. Every heat treated lot, approximately 3000 lbs. is sampled and destructively tested for material strength and link elongation - assuring compliance to design criteria. All Tuna Net Chain is then proof tested, 100%, every link.

ACCO® Tuna Net Chain is then continuously Hot Dip Galvanized to provide the deep strong protective coating you have come to expect which has over 30% more zinc per unit volume than mechanical coating. In the hot dip process the galvanized zinc coating is alloyed with the base steel creating a METALLURGICAL bond that is several orders of magnitude stronger than mechanical bonding. This zinc-steel bond is immune to further corrosion for the life of the zinc. If the chain's steel base is exposed by cuts or nicks, the base steel will not rust until the nearby zinc is consumed.

Hot Galvanized Tuna Net Chain

Trade Size	Wire Dia. Inches	WLL Lbs.	Inside Length	Inside Width	Wt. Per Drum Lbs.	Ft. Per Steel Drum	Hot Galvanized Stock No.
